

DSE-compatible according to EN 12464

#### Product features

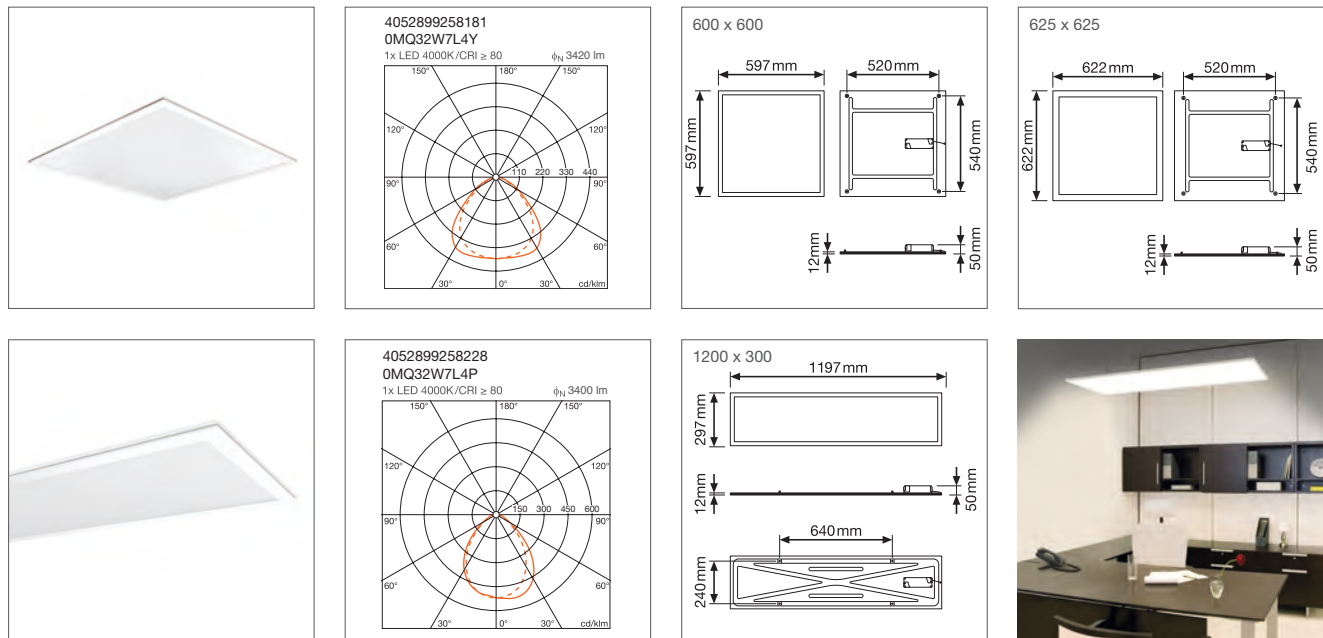

- System designed for LED with efficiency of up to 106 lm/W
- Replacement for T5 and T8 louvre luminaires (3 x 14 W/18 W)
- UGR 19 for standard rooms
- New, elegant design with flat construction (12 mm without ECG)
- High quality white aluminium frame
- Colour temperatures: 3000 K and 4000 K
- Five years guarantee\*

– Energy efficiency class of LED modules contained: A++, A+, A. LED modules are non-replaceable

**Homogeneous light and an elegant design**

Thanks to lateral coupling of the OSRAM LED DURIS E5 light, the LEDVANCE® AREA features uniform illumination to provide ideal lighting conditions for offices (DSE-compatible). The high quality, white aluminium housing is especially flat with dimensions of just 12 mm. The timeless design together with premium materials ensures an especially elegant visual appearance.

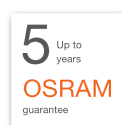

**Flexibility with mounting and applications**

The LEDVANCE® AREA is installed as a lay-in luminaire in suspended ceilings. In addition to linear versions with 1200 mm x 300 mm, square designs with 600 mm x 600 mm or 625 mm x 625 mm are also available.

With its standard dimensions and the low connected load of max. 32.5W, LEDVANCE® AREA presents itself as a low-maintenance and energy-efficient alternative to conventional louvre luminaires with 3 x 14W or 3 x 18W. Energy savings of up to 40 %, compared to T5 or T8 recessed luminaires, can be realized – maintenance costs for regular lamp replacement are also eliminated due to the long service life of the LED luminaire.

**Applications**

- Offices, retail spaces and conference rooms
- Corridors and foyers
